UX READING LIST · 4 BOOKS

The books that shaped how I design.

Start here. It's the book that taught me to blame the design, not the user.

BOOK 01 · FOUNDATIONS

The Design of Everyday Things

Don Norman

WHY IT MATTERS

Affordances, signifiers, feedback — the vocabulary every design critique borrows from.

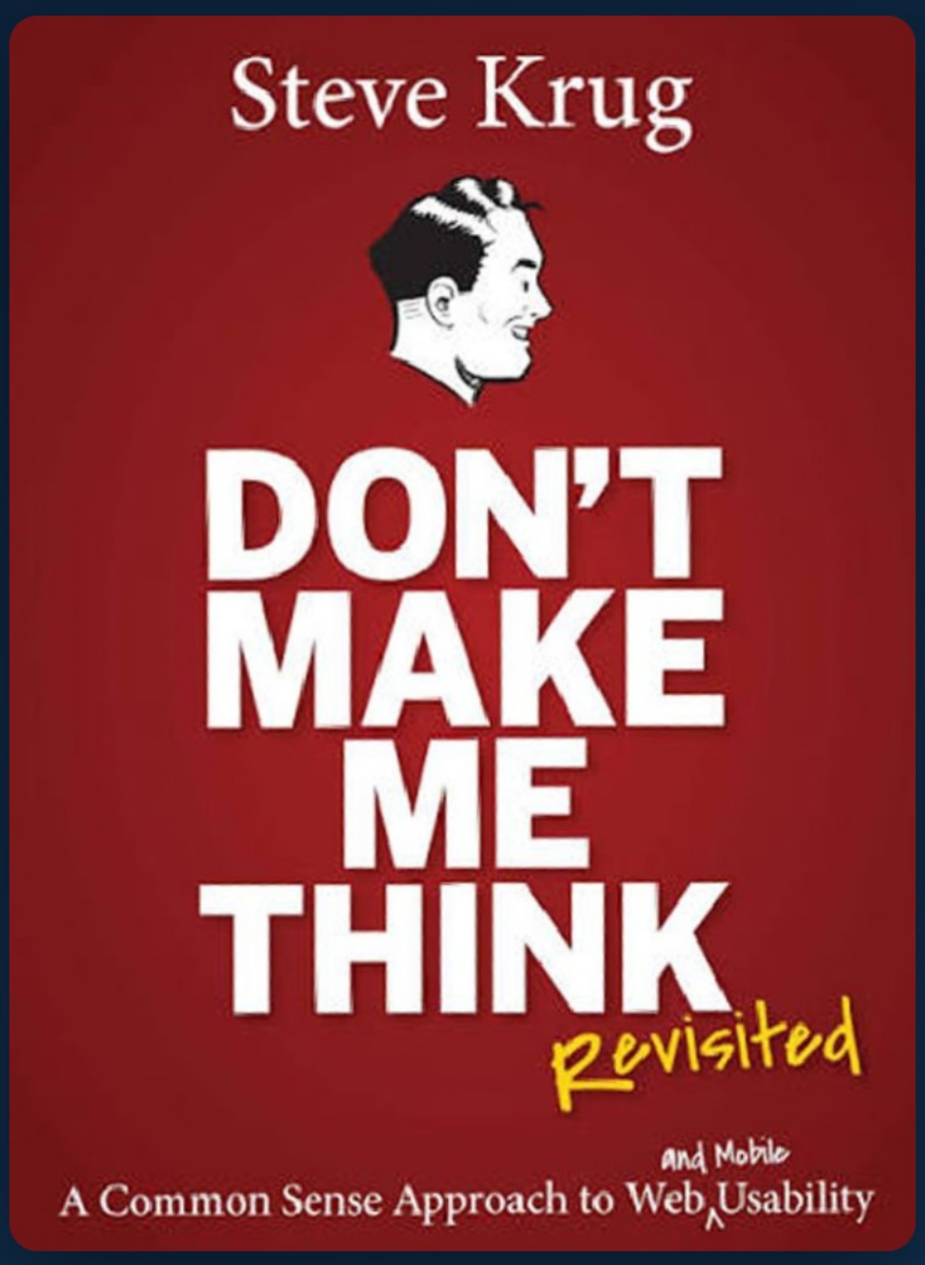

Md Abdul Aleem
Senior Product Designer @Colaberry

UX READING LIST

If users have to think, it isn't done.

The most practical usability guide out there — and you can finish it in a weekend.

BOOK 02 · USABILITY

Don't Make Me Think

Steve Krug

WHY IT MATTERS

People scan, they don't read. Design for that, and test with three users, not thirty.

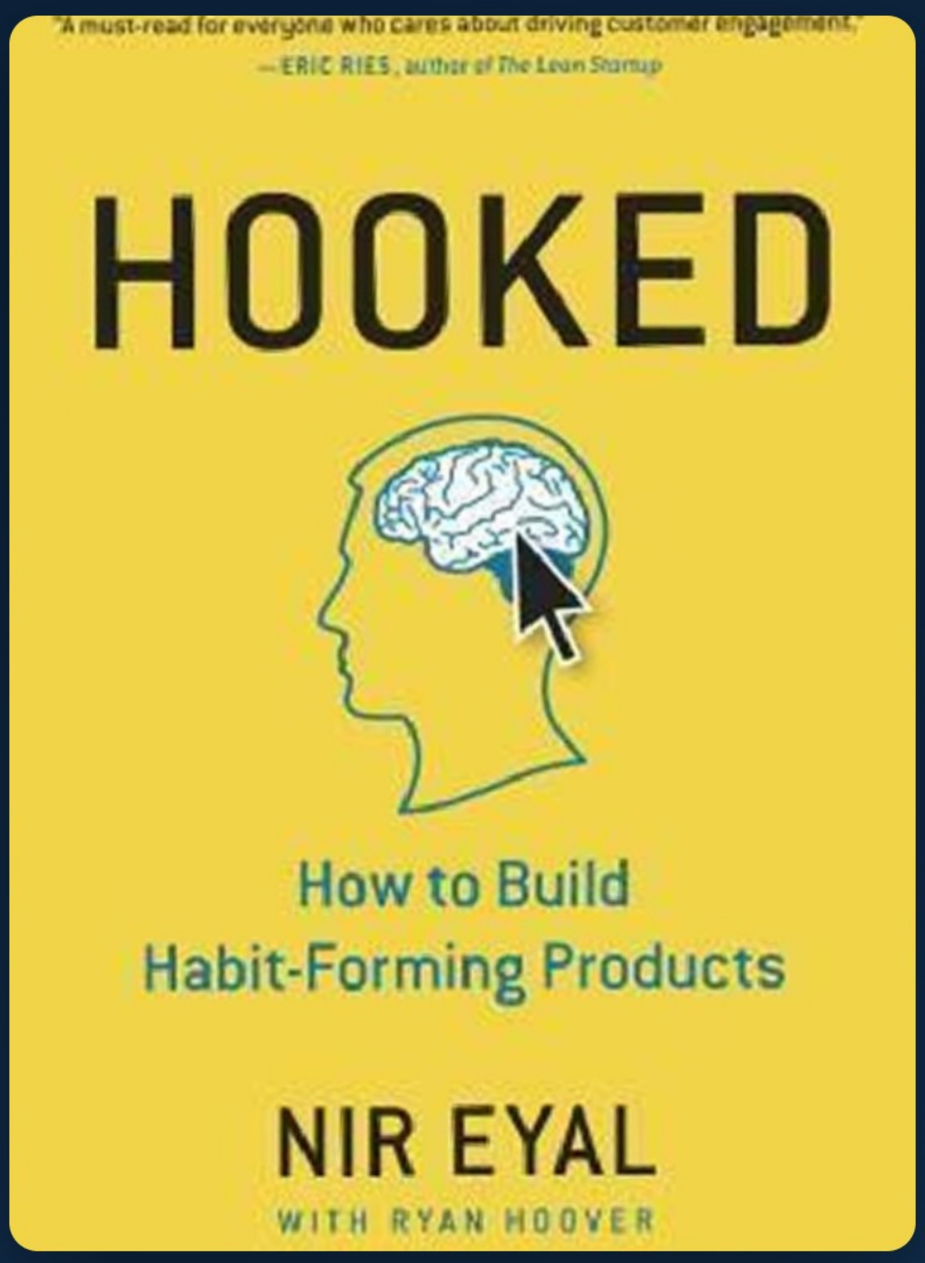

Md Abdul Aleem
Senior Product Designer @Colaberry

UX READING LIST

Habits aren't accidents. They're designed.

A clear model for why people come back to a product. Worth knowing, worth using carefully.

BOOK 03 · BEHAVIOR

Hooked

Nir Eyal

WHY IT MATTERS

Trigger → action → reward → investment. Once you see the loop, you see it everywhere.

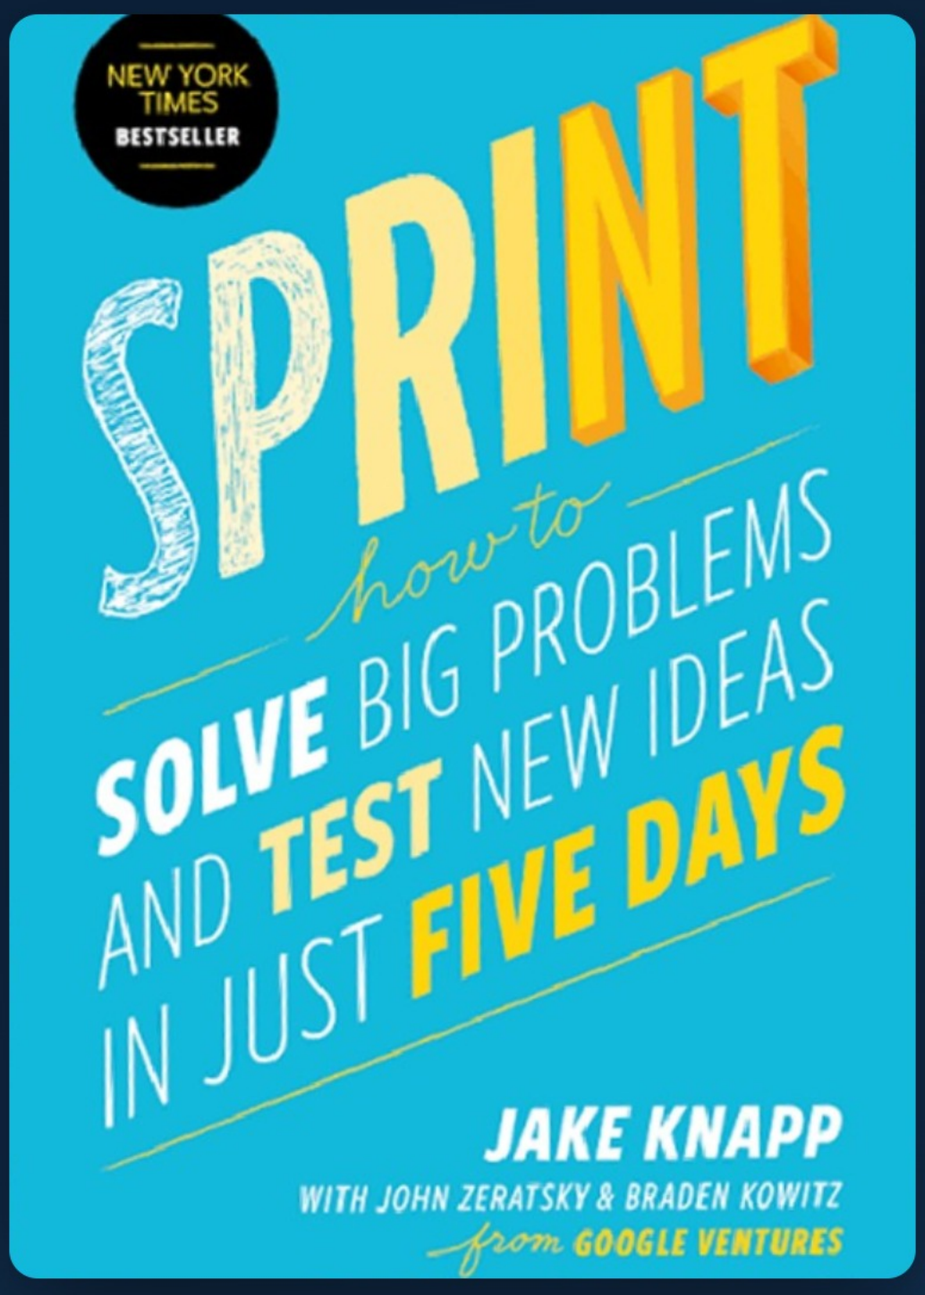

Md Abdul Aleem
Senior Product Designer @Colaberry

UX READING LIST

From idea to tested prototype in five days.

A step-by-step way to answer big product questions before anyone writes code.

BOOK 04 · VALIDATION

Sprint

Jake Knapp

WHY IT MATTERS

Map, sketch, decide, prototype, test. Five days that save months of building the wrong thing.

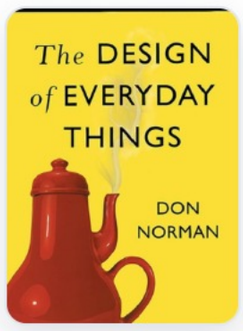

Md Abdul Aleem
Senior Product Designer @Colaberry

UX READING LIST

How to read the stack.

In this order. Each one builds on the last.

01

Learn the principles

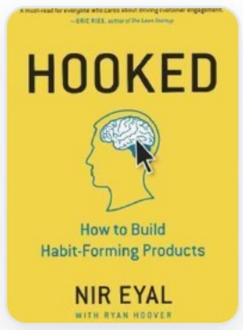

Norman gives you the language to explain why something works — or doesn't.

02

Apply them to screens

Krug turns theory into checks you can run on your next review.

03

Understand behavior

Eyal explains what brings people back — and where the ethical line sits.

04

Put it to the test

Knapp shows you how to prove it with real users in a single week.
